

# **Numerical optimization by Nature Inspired Algorithms**

**Ponnuthurai Nagaratnam Suganthan**  
**Nanyang Technological University, Singapore**

**Abstract:** In recent years, a huge number of nature inspired optimization algorithms have been proposed. This talk will discuss a few of these methods such as HSA, DE and PSO. The talk will also discuss the necessity for developing additional nature inspired heuristics. The talk will also attempt to answer whether strongly nature inspired algorithms or mildly nature inspired algorithms will perform better in general.
